

Celebratory Fare with freshness, sustainability, and full recyclability!

For any festive season or special event, serve up the best celebratory meals with our thermoformed recycled polyethylene (rPET) trays. Perfect for packaging meats and trimmings, our trays offer numerous benefits to ensure your dishes are high-quality, delicious, and environmentally sustainable.

Perfect for packaging meats and trimmings

Festive Freshness

Ensure every celebration is memorable with our rPET trays, designed to keep your products as fresh as the day they were packaged, while maximising the shelf appeal of your products through high-clarity material.

Perfect Protection

Our trays provide robust protection for your products, keeping food safe, pristine, and ready for display. With options for hinge-pack, resealable lids, or MAP trays with heat-sealed lidding film, your products are not only secure but also presented beautifully, helping to reduce waste by minimising product damage.

Celebrate in style with sustainable and functional packaging designed to enhance both product appeal and consumer experience. Our rPET trays combine innovation and convenience, offering flexible solutions in a variety of sizes, colours, and depths to suit every need. Whether it's a single or multi-cavity design, our trays are freezer-safe, hygienic, and ideal for automated production lines.

Commitment to Quality and Sustainability

We're dedicated to providing packaging that upholds the highest standards of quality and sustainability.

All products available in up to 100% rPET and fully recyclable through kerbside collection
