

# Shelf ready collation trays

**Showcase with clarity:**  
our sustainable shelf-ready collation trays elevate product visibility with unparalleled durability and hygienic design.

Explore the following features to understand why our trays stand out in the market.

## Durability and Strength:

- Excellent resistance to impact, compression, and bending forces, ensuring durability even in humid or wet conditions.
- Supports heavier products without collapsing or deforming.

## Visual Appeal and Presentation:

Leverage the attractiveness of your food product's packaging with our transparent collation trays. Avoid extra branding costs and let the original vibrant food packaging design speak for itself, directly engaging customers and boosting sales.

**Ideal  
for dairy  
products**

## Hygiene and Cleanliness:

- The 100% water-resistance makes them suitable for perishable goods, as well as dry goods.
- Can withstand freezing temperatures down to -18°C for standard rPET.
- Easily wiped clean or sanitised, maintaining hygiene standards. Some alternative trays are more challenging to clean and may harbour bacteria or odours.

## Customisation and Design:

- Ready to use – no on-site assembly required.
- Can be customised to fit specific product dimensions.
- The materials used allow for embossed logos, brand names, braille, or recycling labelling.

# A Sustainable Solution

Available in up to 100% rPET and fully recyclable

## Environmental Benefits:

- Our rPET trays are fully recyclable, allowing them to be collected (after use), processed, and transformed into new packaging or other plastic products, thereby closing the recycling loop.
- The lightweight nature of rPET trays is crucial for logistics. It reduces transportation costs and minimises the environmental impact associated with shipping.

## Specific Features

**De-Nesting:** Suitable for high speed automated production lines.

**High Rigidity and Barrier Performance:** These trays maintain their shape and provide an excellent barrier against external factors – ideal to keep round dairy pots and products safe in transit and on shelf.

**Available in 100% rPET:** Ideal for retailer in-store closed loop recycling initiatives.
